DESCRIPTION

Black Pistol Fire is a high-octane rock duo based out of Austin, Texas by way of Toronto, Canada; composed of Kevin McKeown on guitar/lead vocals and Eric Owen on drums. Drawing inspiration from blues, R&B and rock greats such as Led Zeppelin, Chuck Berry, Nirvana, Buddy Holly and Muddy Waters, BPF's gritty and dynamic performances are fueled by undeniable musicianship. Dubbed the "next big thing" by Huffington Post, BPF has developed a reputation for their untamed live performances. Described as "Pure fire on stage"(Degenrefy), they are quickly becoming festival veterans, including performances at Lollapalooza, Austin City Limits, Bonnaroo, Sasquatch Music Festival, Shaky Knees and Governor's Ball, among others. Yahoo Music described Black Pistol Fire as "a power duo that can almost match the power and intensity of the massive rock sounds of the likes of Led Zeppelin and Fleetwood Mac... in a breakout set."

Black Pistol Fire has shared the stage with acts like Gary Clark Jr, Weezer, Heart, Wolfmother, Black Rebel Motorcycle Club and Band of Skulls. Their signature sound has been featured throughout television and entertainment. Their single, "Show Pony" was featured in the Ted 2 official trailer and they performed their song "Blue Eye Commotion" in a national T-Mobile TV ad. Their music can also be heard in Madden '15 and Tony Hawk Pro Skater 5 video games and in numerous TV shows including Sons of Anarchy, Castle and About a Boy. "Black Pistol Fire... were, by far, the best band that played LouFest... This was the craziest I've seen any of the crowds at the festival... Drummer Eric Owen, shirtless and wrists wrapped, pounded the skins like he was summoning a devil. McKeown stomps so hard during his rough and intricate dirty blues, you thought he would make a hole in the stage... A must see." – KDHX

"Our fifth album is a representation of our listening habits. It has a roller coaster effect, with many different tempos and influences ranging from garage-punk, to hip-hop, soul, and everything else that we might listen to on a given day. It is meant to act like a mixtape or Spotify playlist, where the listener won't know what'll hit them next!"
