DESCRIPTION

IWYMI is a monthly instrumental Hip Hop compilation designed to showcase various beat makers and producers from all over the world. "It's What You Make It" is not only relative to making any form of art, it's also a metaphor for life and how we all approach things differently.

Tracks on each volume are selected based on style and sound in order to form cohesive releases that flow front to back. With that said, the overall sound and themes presented will vary throughout the series.
